

Combined Saw Cutting has been providing saw cutting, core drilling and concrete removal services to the construction and civil engineering industries for over 16 years. We pride ourselves on our reputation which is built on our friendly, reliable staff and high standards of safety and professionalism.

To ensure our staff are able to carry out their responsibilities and maintain our high standard of performance in their work, we provide them with the opportunity to improve their skills through on the job training, both in house and through manufacturer sponsored training programmes.

To ensure a safe working environment, all our staff follow strict safety procedures to ensure work is carried out with minimum risk and to the highest professional standard.

If you feel you have the required expertise to offer us in relation to this position, we look forward to reviewing your resume.

Essential Criteria

- A minimum of 12 months experience in wall sawing and wire sawing;
- Availability to work extended hours outside of normal business hours;
- A current Workcover green card; and
- A strong commitment to safety, quality and customer service.

Desirable Criteria

- Previous experience in safe demolition practices; and
- Current driver's licence

Location

The office and workshop are currently located at Auburn, NSW but the successful applicant will be required to work on site, predominantly in the Sydney metropolitan area and occasionally in Regional NSW and interstate.

Salary

An attractive salary and conditions will be negotiated depending on experience and qualifications.
